

# Corning® 5L Erlenmeyer Flasks

Efficient scale-up of suspension cultures

CORNING

The Corning 5L Erlenmeyer flasks are designed to help scale-up suspension culture with space efficiency in mind. The flasks are sterile and ready-to-use, ideal for shaker culture applications, and storage.

## Materials

- ▶ Vessels are constructed from polycarbonate that has been tested and shown to be noncytotoxic. This USP Class VI material provides excellent optical clarity and mechanical strength.
- ▶ Caps are constructed from USP Class VI polypropylene that is free from heavy metals.

## Features

- ▶ Available with either baffled or plain bottom
- ▶ Molded-in graduations for accuracy
- ▶ Large vent cap isolates the container it is placed on from the environment while allowing gas exchange and reducing spills.
- ▶ Sterility Assurance Level (SAL) of  $10^{-6}$
- ▶ RNase-/DNase-free
- ▶ Nonpyrogenic
- ▶ Erlenmeyer flasks are autoclavable once at 121°C, 15 psi for 20 minutes. Repeated autoclaving weakens the flask and is not recommended. Vent cap is not autoclavable.

## Safely Fill, Sample, and Empty with Aseptic Transfer Caps

Corning 5L Erlenmeyer flasks with aseptic transfer caps protect against adventitious contamination during liquid transfer. The transfer caps have two ports: a port ending in a 0.2  $\mu\text{m}$  filter and a port with chemically resistant, heat sealable flexible tubing ending in a male polycarbonate quick connect. The dip tube reaches all the way to the bottom of the flask for complete transfer of liquids. The transfer caps are available separately or pre-assembled on plain- or baffled-bottom flasks. All units arrive sterile, individually doubled-bagged, assembled, and ready-to-use.

Corning has a portfolio of over 200 components that can be assembled to your specifications. Contact your Corning Account Manager or Bioprocess Specialist for more information.

## Ordering Information

### Corning 5L Erlenmeyer Flasks

Cat. No.	Description	Qty/Pk	Qty/Cs
431684	5L Erlenmeyer flask, vent cap, baffled bottom	1	4
431685	5L Erlenmeyer flask, vent cap, plain bottom	1	4
431682	Vent cap for 5L Erlenmeyer flasks	1	24
11501	5L Erlenmeyer flask, aseptic transfer cap, plain bottom	1	2
11502	5L Erlenmeyer flask, aseptic transfer cap, baffled bottom	1	2
11500	Aseptic transfer cap for 5L Erlenmeyer flasks (flask not included)	1	4
